

# Agency

1. Choose how you want to start the audit—launch it from the homepage or run it from your workspace.

The screenshot shows the RankEcho homepage. The navigation bar includes 'Product', 'Solutions', 'Benchmarks', 'Resources', 'Pricing', 'Free audit', and 'Workspace'. The main heading is 'AI. Start shaping it.' Below it, a paragraph describes RankEcho as an AI search visibility optimization platform. Two buttons are visible: 'Sitewide audit' and 'Page-level audit'. A text input field contains 'https:// yourdomain.com'. A blue circle highlights the 'Free audit' button in the top right navigation bar. To the right, a 'Sample visibility snapshot' shows a score of 56/100 and a table of AI citations.

RankEcho is an **AI search visibility optimization** platform for **agencies delivering AI visibility reports to clients** and **B2B SaaS teams fixing missing AI citations on their category pages**. It finds the prompts where **ChatGPT, Claude, Gemini, Perplexity and Google AI** ignore your brand, generates the deploy-ready fix, and re-tests the same prompts to prove the citation appeared.

**Sitewide audit**  
Brand-level visibility intelligence

**Page-level audit**  
Optimization workflow for one URL

https:// yourdomain.com

**Run free audit →**

Free audits check Perplexity and Gemini - paid plans add ChatGPT, Claude & Google AI Overviews.

**Sample visibility snapshot** (demo audit)

3. Navigate to the Audits section to explore detailed site visibility data and recent reports.

The screenshot shows the RankEcho workspace dashboard. On the left sidebar, the 'Audits' section is highlighted with a blue circle. The main content area displays a summary of audits with the following metrics: 6 Clients Audited, 24% Avg Citation, 4 Needs Fixes, and 1 Report Ready. Below these metrics are buttons for 'Open portfolio', 'Export portfolio CSV', 'Download brief', and 'Share portfolio snapshot'. The dashboard lists three audits:

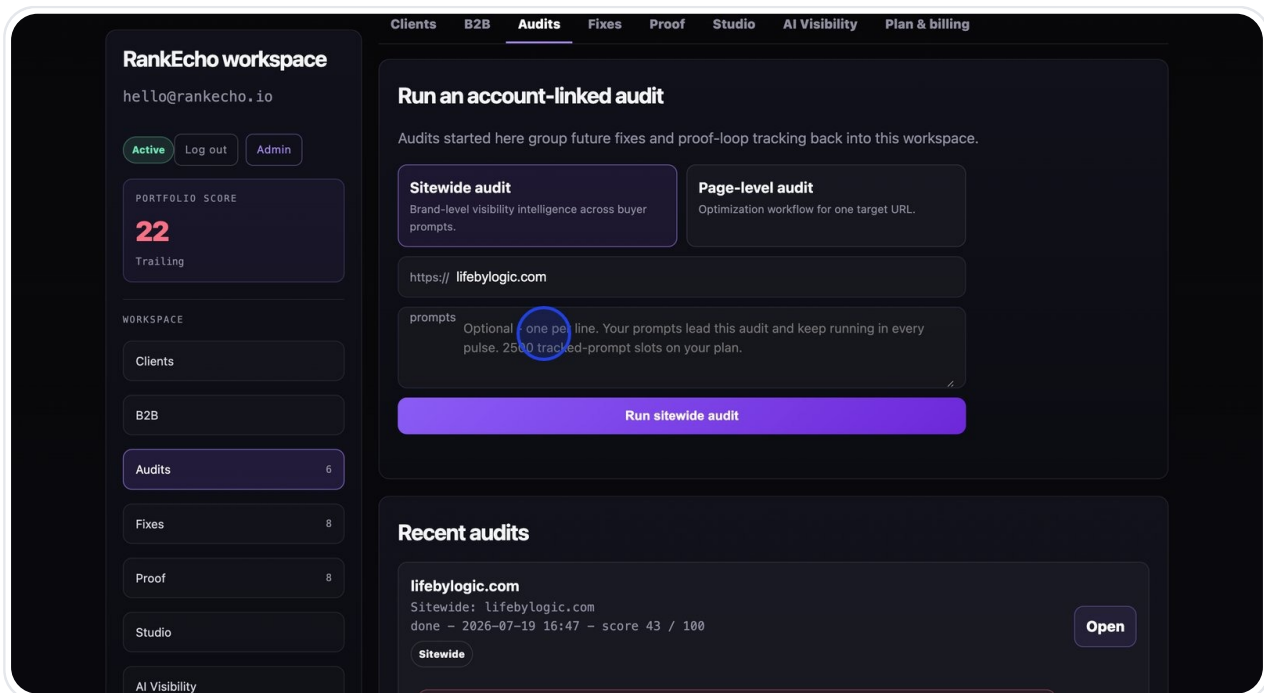

- lifebylogic.com**: Sitewide: lifebylogic.com, score 42% - 2026-07-19 16:51. Status: Needs proof, 3 fix package(s), Sitewide. Buttons: Track, 3 fix(es), 0 proof loop(s), Remove.
- rankecho.io**: Sitewide: rankecho.io, score 0% - 2026-07-19 12:03. Status: Needs fix, 12 gap(s) found, Sitewide. Buttons: Generate, 0 fix(es), 0 proof loop(s), Remove.
- lifebylogic.com**: Sitewide: lifebylogic.com, score 50% - 2026-07-18 15:15. Status: Needs fix, 6 gap(s) found, Sitewide. Buttons: Generate, 0 fix(es), 0 proof loop(s), Remove.

4. Add or edit the website you want to audit for a comprehensive analysis.

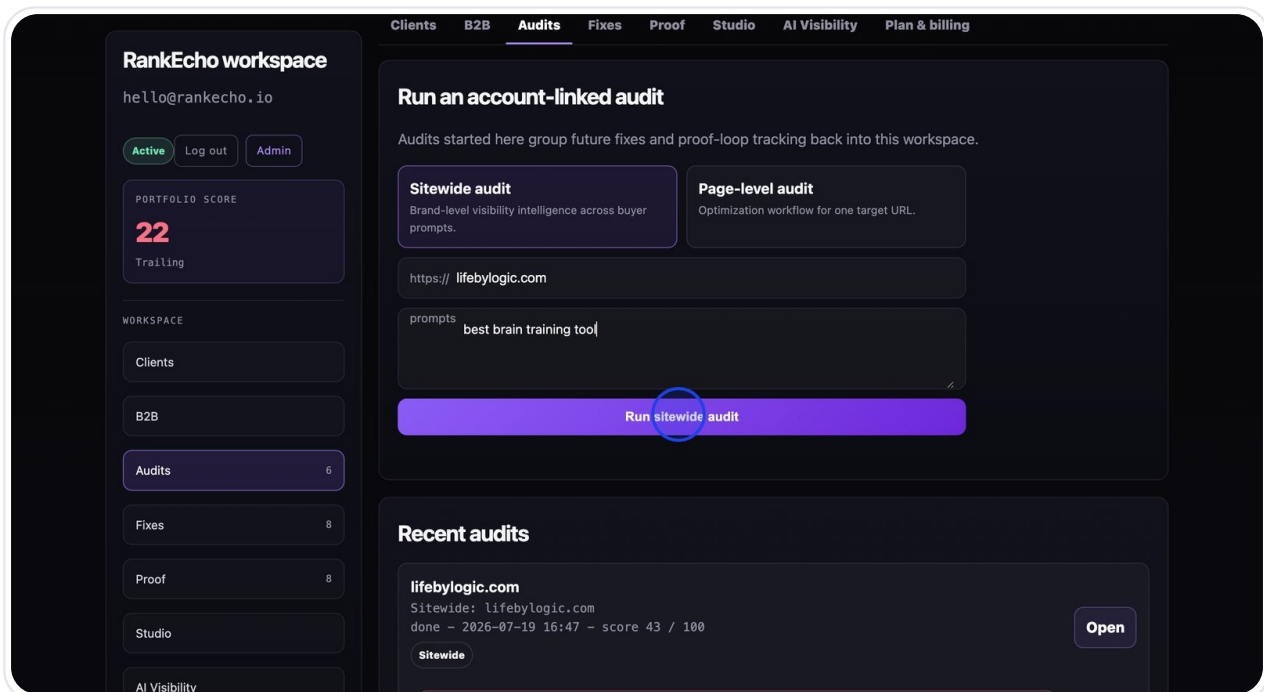

The screenshot shows the RankEcho workspace dashboard with the 'Audits' section selected in the sidebar. The main content area displays the 'Run an account-linked audit' form. The form includes a 'Sitewide audit' section with a text input field containing 'https:// client-or-brand.com' (highlighted with a blue circle) and a 'Page-level audit' section. Below the input fields is a 'Run sitewide audit' button. The 'Recent audits' section shows a list of audits:

- lifebylogic.com**: Sitewide: lifebylogic.com, done - 2026-07-19 16:47 - score 43 / 100. Button: Open.

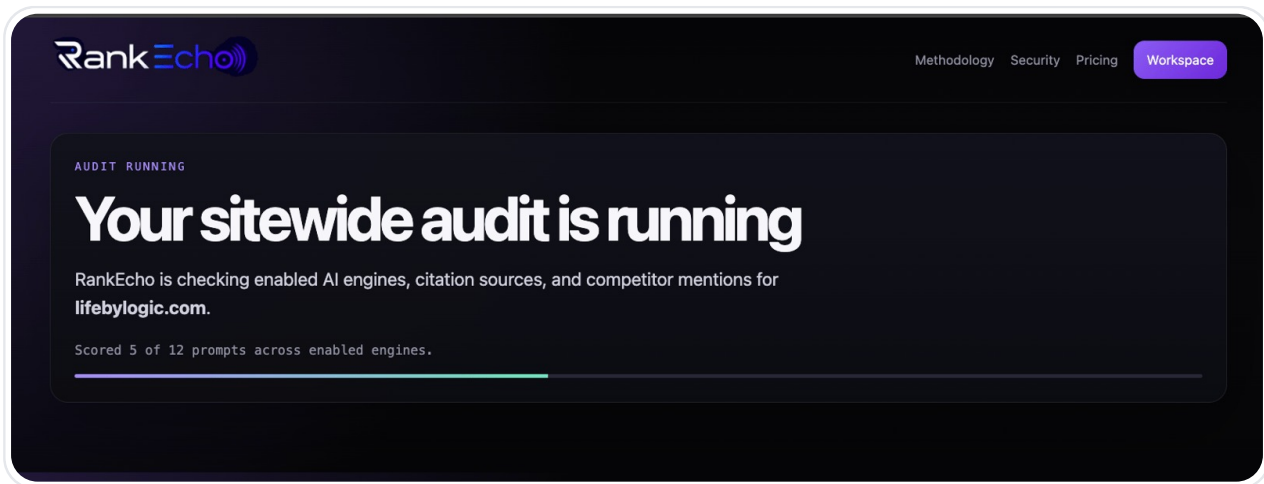

5. Customize your audit by entering focus prompts that match your business goals.

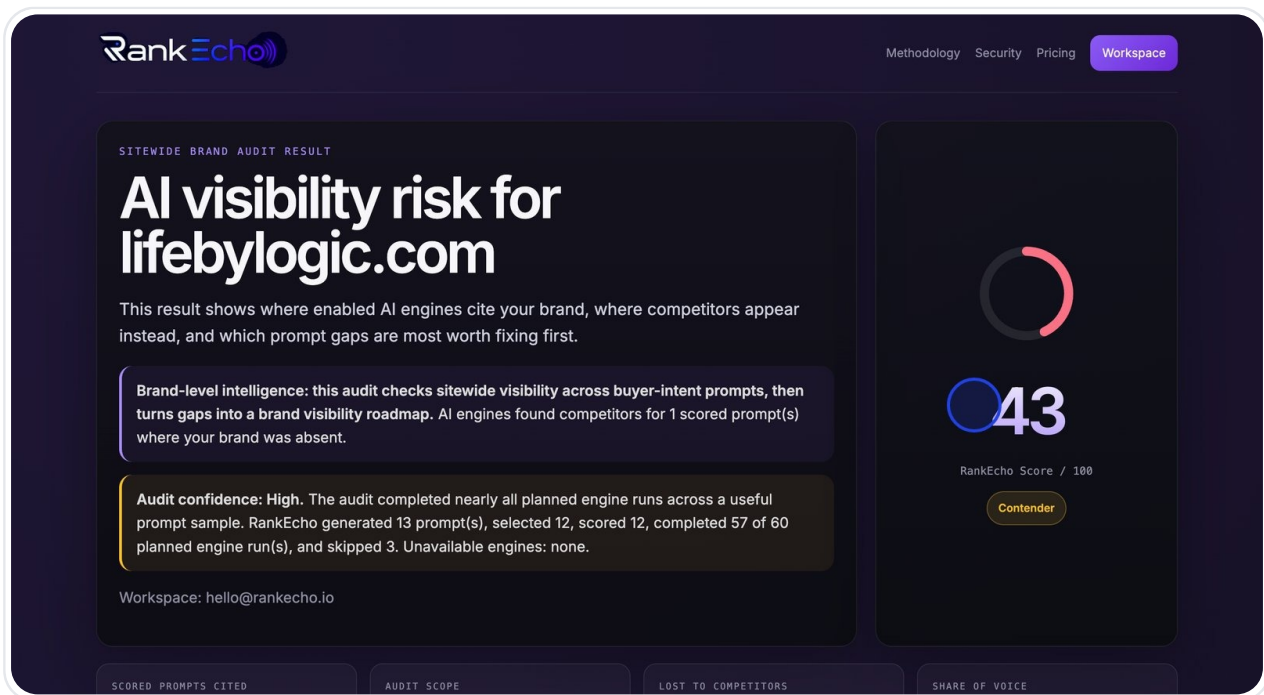

6. Click Run sitewide audit to get instant, AI-powered insights for your entire website.

7.

8. RankEcho Score reveals a detailed audit, spotlighting your site's strengths and key SEO risks.

9. The recommended fix sequence for a clear, step-by-step workflow to close your biggest SEO gaps first.

Recommended fix sequence

Fix, ship, prove: start with the prompt most likely to replace competitor visibility, publish the citable answer, then track the same prompt after shipment.

1

I want to understand my behavioral patterns — are there free self-assessment tools grounded in peer-reviewed research?

No page on the site answers this prompt yet - create one (the fix package drafts it) and publish it where it fits the site's structure.

Cause: Content gap

Competitor replacement opportunity

Est. demand: Low (proxy)

Brand visibility

Track same prompt after publish

## 21. Focus on critical editorial guidelines—crafting precise, expert definitions boosts both trust and rankings.

- Why Is Knowing Your Chronotype a Form of Brain Training?
- How Does Life by Logic Compare to Coursera, Psychology Today, and Class Central for Brain Training?
- Who Should Use the Life by Logic Chronotype Test?
- What Does Your Morning, Evening, or Intermediate Result Mean for Cognitive Performance?
- How Do You Apply Your Chronotype Result to Real Brain Training?

**Must answer**

- Define 'brain training tool' in terms of cognitive self-knowledge, not just games or courses
- Explain the 14-item chronotype assessment methodology and what age/sex calibration adds
- State clearly that the tool is free and accessible at [lifebylogic.com/brain-lab/chronotype-tool/](https://lifebylogic.com/brain-lab/chronotype-tool/)
- Explain how chronotype classification (morning / intermediate / evening) maps to brain performance windows
- Contrast with Coursera (course platform, no assessment), Class Central (directory, no tool), and Psychology Today (unvalidated quizzes)
- Describe the three chronotype outputs and their practical cognitive implications
- Connect chronotype awareness to scheduling learning, focus sessions, and decision-making

**Technical checklist**

- Publish the front-loaded answer block on a page that directly targets this prompt.

**Offsite source plan**

[Download source plan CSV](#) Paste-ready for outreach or content-placement platforms.

**Angle**

Position the Life by Logic Chronotype

## 22. Download your source plan CSV to streamline outreach and multiply content authority with targeted references.

**Technical checklist**

- Publish the front-loaded answer block on a page that directly targets this prompt.

**Offsite source plan**

[Download source plan CSV](#) Paste-ready for outreach or content-placement platforms.

AI engines cite this prompt primarily from independent blogs & directories (26 surfaces) and engine infrastructure (8), with minor presence on YouTube and app stores. No single competitor dominates—the gap is in structured, citable third-party mentions that frame Life by Logic's Chronotype Test as a brain training tool. Placing brand mentions on the exact surfaces AI already pulls from (listicle blogs, Reddit threads, niche psychology/productivity directories) will directly increase citation probability. The angle must reframe 'chronotype test' as a cognitive training entry point to match the 'brain training tool' query intent.

**Targets**

- Reddit: [r/productivity](#), [r/neuroscience](#), [r/DecidingToBeBetter](#) — post or comment positioning the free chronotype test as a prerequisite brain-baseline tool before starting any training program
- Independent productivity/neuroscience blogs already ranking for 'best brain training tools' — pitch a contributed data point or tool mention with the specific URL
- Slant.co or AlternativeTo-style directories — submit [lifebylogic.com/brain-lab/chronotype-tool/](https://lifebylogic.com/brain-lab/chronotype-tool/) under 'brain assessment tools' or 'cognitive productivity tools'
- Medium or Substack articles on morning vs evening productivity — add the Life by Logic Chronotype Test as the cited free tool for identifying cognitive type

**Angle**

Position the Life by Logic Chronotype Test not merely as a quiz but as the foundational brain-profiling step before any cognitive training—the tool that tells you *"when"* your brain is ready to be trained, making it a prerequisite rather than an alternative to platforms like Coursera.

23. Highlight any source plan detail to reference or share key data driving your link-building or PR strategy.

### Technical checklist

- Publish the front-loaded answer block on a page that directly targets this prompt.

### Offsite source plan

[Download source plan CSV](#) Paste-ready for outreach or content-placement platforms.

### Analysis Studio

Interactive series over this workspace's own audit history and proof loops. Observed runs only - nothing smoothed, nothing interpolated; thin samples are badged sparse.

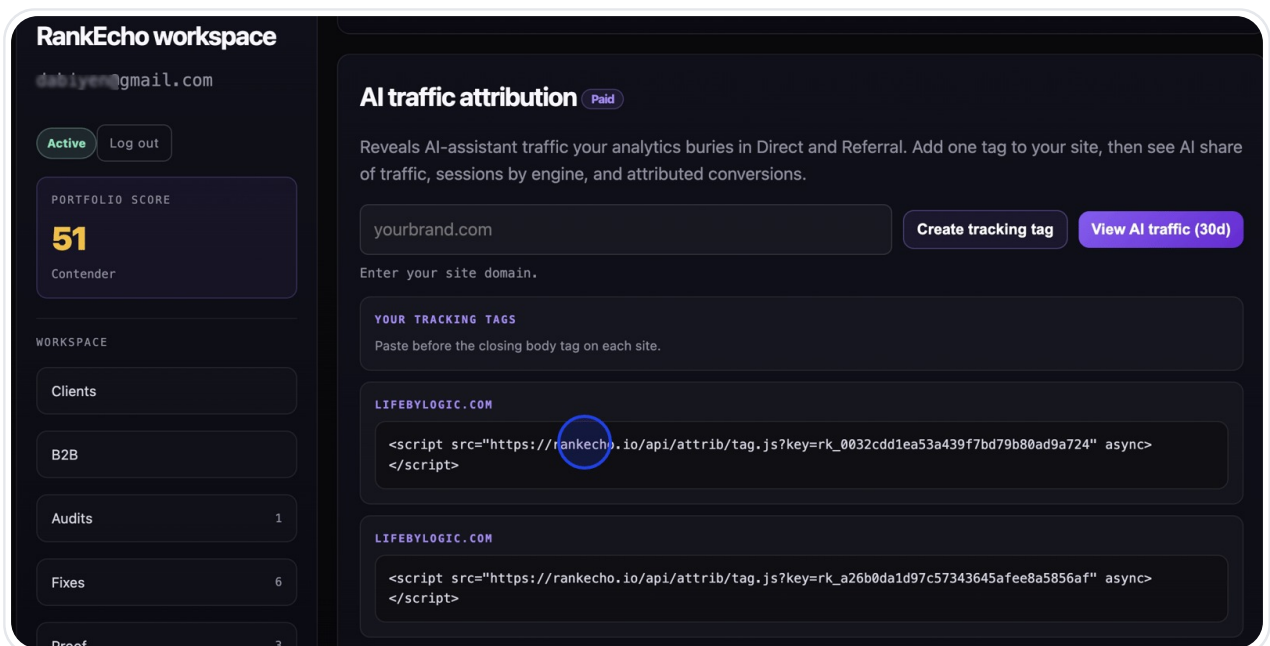

New: [AI Traffic Lens](#) - import a referrer CSV export and see how much of your traffic is already AI-driven, including the sessions GA4 buries in Direct and Referral.

45.

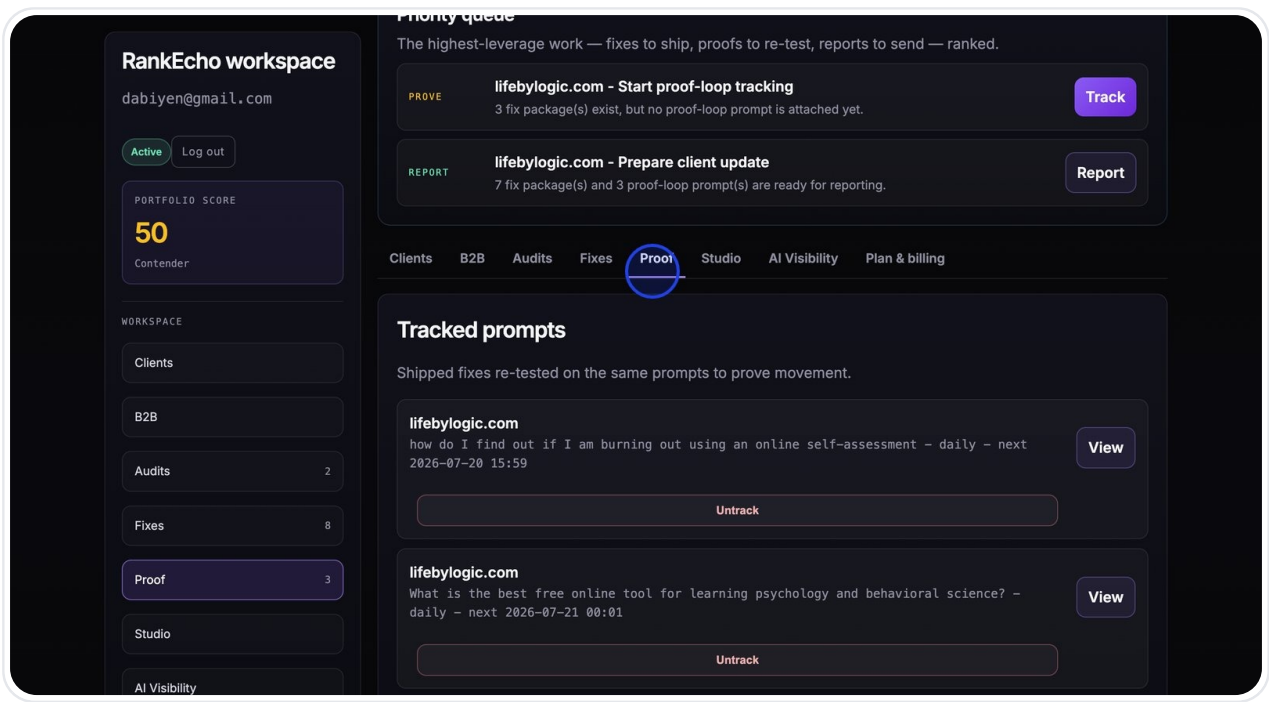

46. AI traffic hides in analytics as Direct. One tag per client site surfaces it — share of traffic, sessions by engine, attributed conversions.

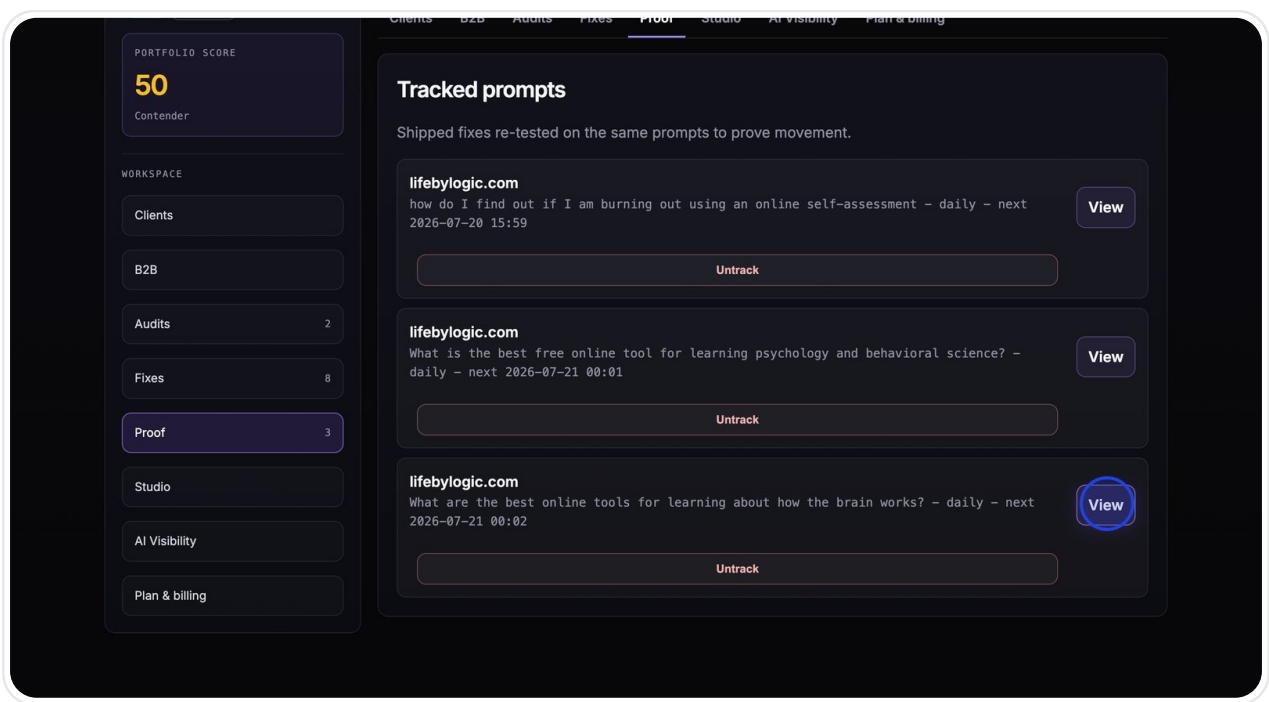

AI traffic hides in analytics as Direct. One tag per client site surfaces it — share of traffic, sessions by engine, attributed conversions. That's Traffic Lens.

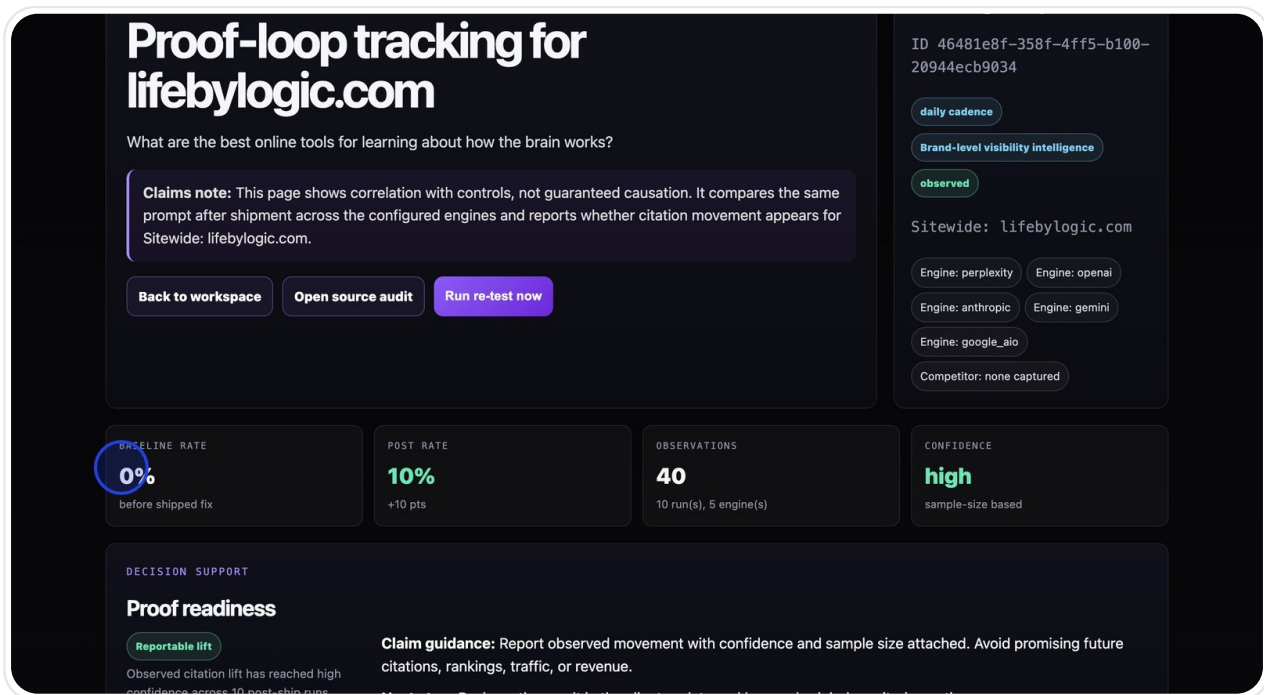

47. Navigate to Tracked prompts for an instant snapshot of all shipped and in-progress prompts.

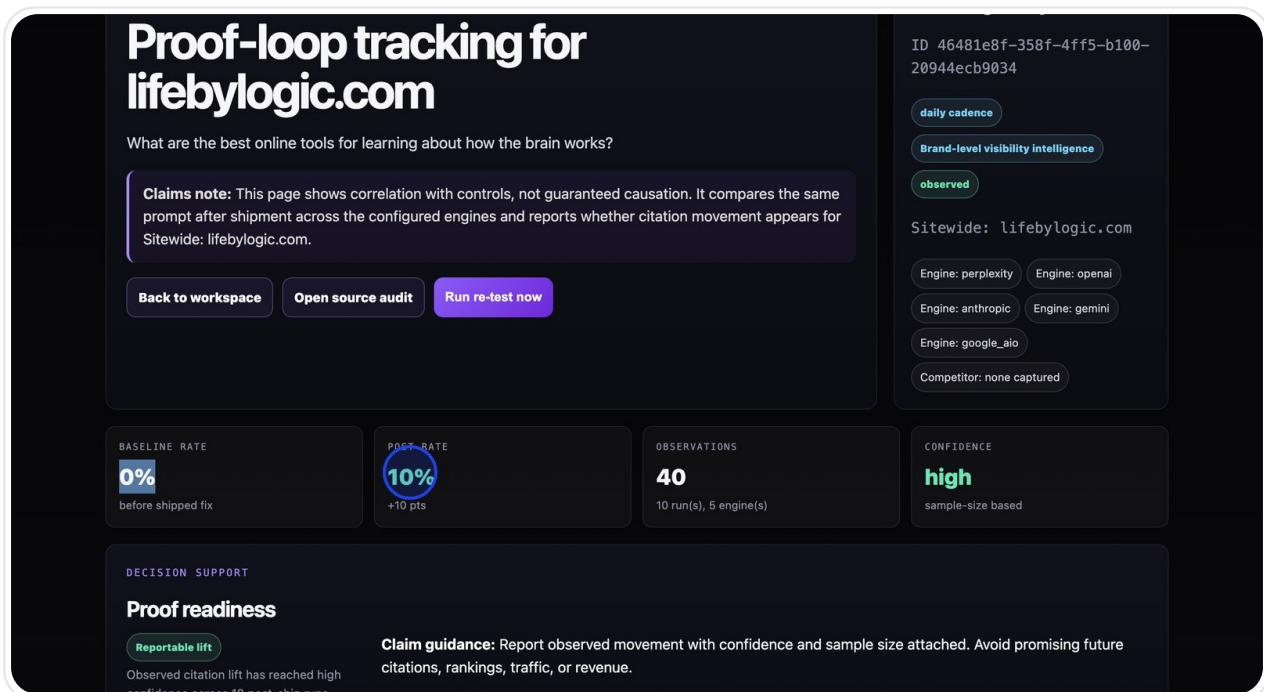

48. Click View next to a tracked prompt to dive into detailed proof-loop outcomes for a specific prompt.

#### 49. Baseline before fix.

#### 50. Percent change of the citation movement metrics with high certainty.

51. Click Confidence level to reveal the reliability of your analysis results.

# Proof-loop tracking for lifebylogic.com

What are the best online tools for learning about how the brain works?

**Claims note:** This page shows correlation with controls, not guaranteed causation. It compares the same prompt after shipment across the configured engines and reports whether citation movement appears for Sitewide: lifebylogic.com.

Reportable lift

Observed citation lift has reached high confidence across 40 post-ship runs

Claim guidance:

Report observed movement with confidence and sample size attached. Avoid promising future citations, rankings, traffic, or revenue.

52. Four citations landed within the first four days after the fix.

## Observation timeline

Each row collapses one re-test run into a citation rate across engines that returned a non-skipped answer.

AUDIT TARGET

Sitewide

Sitewide: lifebylogic.com

Fast movement often suggests retrieval or source discovery. Slower movement can suggest broader model recall, but RankEcho keeps the label conservative until the sample grows.
